

sysio::chain\_apis::  
read\_only::abi\_json  
\_to\_bin

sysio::testing::base  
\_tester::get\_action

sysio::chain::abi\_serializer  
::get\_action\_type

```
graph LR; A["sysio::chain_apis::read_only::abi_json_to_bin"] --> C["sysio::chain::abi_serializer::get_action_type"]; B["sysio::testing::base_tester::get_action"] --> C;
```

The diagram illustrates a dependency or mapping between two source functions and a target function. On the left, there are two white rectangular boxes. The top box contains the text 'sysio::chain\_apis::read\_only::abi\_json\_to\_bin'. The bottom box contains the text 'sysio::testing::base\_tester::get\_action'. On the right, there is a gray rectangular box containing the text 'sysio::chain::abi\_serializer::get\_action\_type'. Two blue arrows point from the right side of each white box to the left side of the gray box, indicating that both source functions are associated with or map to the target function.
