

```
std::enable_shared  
_from_this< fc::api  
_connection >
```

```
graph BT; A[fc::local_api_connection] --> B[fc::api_connection]; B --> C[std::enable_shared_from_this< fc::api_connection >];
```

The diagram illustrates a three-level inheritance hierarchy. At the base is a gray box labeled 'fc::local_api_connection'. A blue arrow points upwards from this box to a white box labeled 'fc::api_connection'. Another blue arrow points upwards from the 'fc::api_connection' box to a white box at the top labeled 'std::enable_shared_from_this< fc::api_connection >'. All boxes have a thin black border.
