

`pump.Output.Append`

`pump.Output.GetLastLine`

`fc::enum_type::string`

```
graph LR; A[pump.Output.Append] --> C[fc::enum_type::string]; B[pump.Output.GetLastLine] --> C;
```

The diagram illustrates a common return type for two methods. On the left, two white rectangular boxes with black borders contain the method names `pump.Output.Append` and `pump.Output.GetLastLine`. Blue arrows point from the right side of each box to a single gray rectangular box on the right, which contains the return type `fc::enum_type::string`. This indicates that both methods return a value of this type.
