

sysio::chain::apply  
\_sysio\_newaccount

sysio::chain::apply  
\_sysio\_updateauth

sysio::chain::validate  
\_authority\_precondition

```
graph LR; A["sysio::chain::apply<br/>_sysio_newaccount"] --> C["sysio::chain::validate<br/>_authority_precondition"]; B["sysio::chain::apply<br/>_sysio_updateauth"] --> C;
```

The diagram illustrates a dependency or call relationship. Two source functions, 'sysio::chain::apply\_sysio\_newaccount' and 'sysio::chain::apply\_sysio\_updateauth', are shown in white boxes on the left. Blue arrows point from each of these boxes to a single target function, 'sysio::chain::validate\_authority\_precondition', which is shown in a gray box on the right.
