

sysio::chain::fork
_database_impl::advance
_root_impl

```
graph LR; A["sysio::chain::fork<br/>_database_impl::advance<br/>_root_impl"] --> B["sysio::chain::fork<br/>_database_impl::get<br/>_block_impl"]; A --> C["sysio::chain::fork<br/>_database_impl::remove_impl"]
```

The diagram illustrates a function call branching into two sub-calls. A central box on the left, with a gray background, contains the text 'sysio::chain::fork', '_database_impl::advance', and '_root_impl'. Two blue arrows originate from the right side of this box. The top arrow points to a white box containing 'sysio::chain::fork', '_database_impl::get', and '_block_impl'. The bottom arrow points to another white box containing 'sysio::chain::fork', '_database_impl::remove_impl'.

sysio::chain::fork
_database_impl::get
_block_impl

sysio::chain::fork
_database_impl::remove_impl
