

sysio::chain::apply
_context::db_remove_i64

sysio::chain::apply
_context::db_update_i64

sysio::chain::apply
_context::update_db_usage

```
graph LR; A["sysio::chain::apply<br/>_context::db_remove_i64"] --> C["sysio::chain::apply<br/>_context::update_db_usage"]; B["sysio::chain::apply<br/>_context::db_update_i64"] --> C;
```

The diagram illustrates a dependency or mapping between three functions. On the left, two white rectangular boxes with black borders contain the function names 'sysio::chain::apply_context::db_remove_i64' and 'sysio::chain::apply_context::db_update_i64'. On the right, a gray rectangular box with a black border contains the function name 'sysio::chain::apply_context::update_db_usage'. Two blue arrows originate from the right side of the left boxes and point towards the left side of the gray box, indicating that both 'db_remove_i64' and 'db_update_i64' are inputs or related to 'update_db_usage'.
