

sysio::producer_plugin
::plugin_initialize

sysio::producer_plugin
::update_runtime_options

sysio::chain::controller
::set_greylist_limit

```
graph LR; A["sysio::producer_plugin::plugin_initialize"] --> C["sysio::chain::controller::set_greylist_limit"]; B["sysio::producer_plugin::update_runtime_options"] --> C;
```

The diagram illustrates two function calls originating from the `sysio::producer_plugin` namespace and pointing to a function in the `sysio::chain::controller` namespace. The first call is `plugin_initialize` and the second is `update_runtime_options`. Both calls are represented by blue arrows pointing to the `set_greylist_limit` function. The target function is highlighted in a grey box, while the source functions are in white boxes.
