

testing::internal::
FilePath::RemoveFileName

```
graph LR; A[testing::internal::FilePath::RemoveFileName] --> B[testing::internal::FilePath::c_str]; A --> C[testing::internal::FilePath::FilePath];
```

The diagram illustrates a function call from `testing::internal::FilePath::RemoveFileName` to two internal methods of the `FilePath` class: `c_str` and `FilePath`. The source function is highlighted in a grey box, while the target methods are in white boxes. Blue arrows indicate the direction of the calls.
