

sysio::chain_apis::
read_only::get_table_rows

operator>>

fc::uint128_to_float128

```
graph LR; A["sysio::chain_apis::  
read_only::get_table_rows"] --> C["fc::uint128_to_float128"]; B["operator>>"] --> C;
```

The diagram illustrates a dependency or mapping between three code elements. On the left, there are two source elements: a multi-line function signature 'sysio::chain_apis::read_only::get_table_rows' and a single-line operator 'operator>>'. Both of these have blue arrows pointing towards a single target element on the right, 'fc::uint128_to_float128'. The target element is highlighted with a gray background, while the source elements have white backgrounds.
