

sysio::txn\_test\_gen  
\_plugin\_impl::create  
\_test\_accounts

sysio::txn\_test\_gen  
\_plugin\_impl::send\_transaction

fc::exception::dynamic  
\_copy\_exception

```
graph LR; A["sysio::txn_test_gen  
_plugin_impl::create  
_test_accounts"] --> C["fc::exception::dynamic  
_copy_exception"]; B["sysio::txn_test_gen  
_plugin_impl::send_transaction"] --> C;
```

The diagram illustrates a relationship between two source functions and a target exception class. Two white rectangular boxes on the left represent the source functions: 'sysio::txn\_test\_gen\_plugin\_impl::create\_test\_accounts' (top) and 'sysio::txn\_test\_gen\_plugin\_impl::send\_transaction' (bottom). Two blue arrows point from these boxes to a single gray rectangular box on the right, which represents the target exception class: 'fc::exception::dynamic\_copy\_exception'.
