

mie::VsintT::operator<<

mie::VsintT::operator<<=

mie::VsintT::shl

```
graph LR; A[mie::VsintT::operator<<] --> D[mie::VsintT::shl]; B[mie::VsintT::operator<<=] --> D;
```

The diagram illustrates a mapping from two operator functions to a shared function. On the left, there are two white rectangular boxes. The top box contains the text 'mie::VsintT::operator<<' and the bottom box contains 'mie::VsintT::operator<<='. Two blue arrows originate from the right side of these boxes. The arrow from the top box points to the top of a gray rectangular box on the right, and the arrow from the bottom box points to the bottom of the same gray box. The gray box contains the text 'mie::VsintT::shl'.
