

BOOST_AUTO_TEST_CASE

fc::crypto::webauthn
::public_key::public_key

fc::base64url_decode

```
graph LR; A[BOOST_AUTO_TEST_CASE] --> C[fc::base64url_decode]; B[fc::crypto::webauthn::public_key::public_key] --> C;
```

The diagram illustrates a function call or argument passing. Two input boxes on the left point via blue arrows to a single output box on the right. The top input box contains the text 'BOOST_AUTO_TEST_CASE'. The bottom input box contains the text 'fc::crypto::webauthn' followed by '::public_key::public_key' on a new line. The output box on the right contains the text 'fc::base64url_decode'.
