

`std::exception`

```
graph BT; A[sysio::vm::exception] --> B[std::exception];
```

The diagram illustrates an inheritance relationship between two C++ exception classes. At the bottom, a gray rectangular box contains the text `sysio::vm::exception`. Two blue arrows originate from the top of this box and point upwards to a white rectangular box at the top, which contains the text `std::exception`. The arrows are positioned side-by-side, indicating that `sysio::vm::exception` inherits from `std::exception`.
