

testing::Message::operator<<

testing::Message::operator<<

testing::internal::  
String::ShowWideCString

```
graph LR; A[testing::Message::operator<<] --> C[testing::internal::String::ShowWideCString]; B[testing::Message::operator<<] --> C;
```

The diagram illustrates a call resolution process. On the left, two identical boxes represent the expression `testing::Message::operator<<`. Blue arrows from each of these boxes point to a single box on the right. This right-hand box, which has a gray background, contains the text `testing::internal::String::ShowWideCString`, indicating the final function that is resolved for the operator calls.
