

fc::cfile_datastream::get

fc::cfile_datastream
::skip

fc::cfile_datastream
::read

```
graph LR; A[fc::cfile_datastream::get] --> C[fc::cfile_datastream::read]; B[fc::cfile_datastream::skip] --> C;
```

The diagram illustrates a mapping between two source functions and a target function. On the left, there are two white rectangular boxes. The top box contains the text 'fc::cfile_datastream::get'. The bottom box contains the text 'fc::cfile_datastream' on the first line and '::skip' on the second line. On the right, there is a gray rectangular box containing the text 'fc::cfile_datastream' on the first line and '::read' on the second line. Two blue arrows originate from the right side of the left boxes and point towards the left side of the gray box. The top arrow starts from the right side of the 'fc::cfile_datastream::get' box and points to the left side of the 'fc::cfile_datastream' line of the gray box. The bottom arrow starts from the right side of the 'fc::cfile_datastream::skip' box and points to the left side of the '::read' line of the gray box.
