

chainbase::index_impl
::commit

chainbase::index_impl
::set_revision

chainbase::index_impl
::revision

```
graph LR; A[chainbase::index_impl::commit] --> C[chainbase::index_impl::revision]; B[chainbase::index_impl::set_revision] --> C;
```

The diagram illustrates a relationship between three code elements. On the left, there are two white rectangular boxes with black borders. The top box contains the text 'chainbase::index_impl' followed by '::commit' on a new line. The bottom box contains 'chainbase::index_impl' followed by '::set_revision' on a new line. On the right, there is a single gray rectangular box with a black border containing the text 'chainbase::index_impl' followed by '::revision' on a new line. Two blue arrows originate from the right side of the left boxes and point towards the left side of the gray box. The top arrow starts from the right side of the 'chainbase::index_impl::commit' box, and the bottom arrow starts from the right side of the 'chainbase::index_impl::set_revision' box.
