

libraries/sys-vm/external  
/Catch2/include/internal  
/catch\_session.h

```
graph BT; A["libraries/sys-vm/external  
/Catch2/include/internal  
/catch_session.h"] <--> B["libraries/sys-vm/external  
/Catch2/include/internal  
/catch_default_main.hpp"]; A <--> C["libraries/sys-vm/external  
/Catch2/include/internal  
/catch_session.cpp"];
```

The diagram illustrates a header file inclusion relationship. At the top is a grey box representing the header file `libraries/sys-vm/external/Catch2/include/internal/catch_session.h`. Below it are two white boxes representing source files. Two blue arrows point from the source files up to the header file, indicating that both source files include this header.

libraries/sys-vm/external  
/Catch2/include/internal  
/catch\_default\_main.hpp
