

telemetry_client::on_fail

```
graph LR; A[telemetry_client::on_fail] --> B[websocketpp::endpoint::get_alog]
```

A diagram showing a call from the `telemetry_client::on_fail` function to the `websocketpp::endpoint::get_alog` function. The first function is in a grey box, and the second is in a white box. A blue arrow points from the first box to the second.

websocketpp::endpoint
::get_alog
