

CLI::TriggerOff

CLI::TriggerOn

CLI::App::disabled
_by_default

```
graph LR; A[CLI::TriggerOff] --> C[CLI::App::disabled_by_default]; B[CLI::TriggerOn] --> C;
```

The diagram illustrates a relationship between CLI trigger methods and an application state. Two boxes on the left, 'CLI::TriggerOff' and 'CLI::TriggerOn', have blue arrows pointing to a single box on the right labeled 'CLI::App::disabled_by_default'. The boxes are rectangular with black borders. The left boxes are white, while the right box is gray.
