

libff::bn128\_G2::operator+

validate\_reflection.Empty  
Scope.read

libff::bn128\_G2::add

```
graph LR; A[libff::bn128_G2::operator+] --> C[libff::bn128_G2::add]; B[validate_reflection.Empty Scope.read] --> C;
```

The diagram illustrates a mapping from two source functions to a single target function. On the left, there are two white rectangular boxes. The top box contains the text 'libff::bn128\_G2::operator+' and the bottom box contains 'validate\_reflection.Empty' followed by 'Scope.read' on a new line. On the right, there is a gray rectangular box containing the text 'libff::bn128\_G2::add'. Two blue arrows originate from the right side of the left boxes and point towards the left side of the gray box, indicating that both source functions are mapped to or implemented by the target function.
