

libraries/sys-vm/external
/Catch2/include/internal
/catch_debug_console.h

```
graph BT; A["libraries/sys-vm/external  
/Catch2/include/internal  
/catch_debug_console.h"] --> B["libraries/sys-vm/external  
/Catch2/include/internal  
/catch_debug_console.cpp"]; A --> C["libraries/sys-vm/external  
/Catch2/include/internal  
/catch_stream.cpp"];
```

The diagram illustrates a file dependency structure. At the top is a grey box containing the header file path: `libraries/sys-vm/external/Catch2/include/internal/catch_debug_console.h`. Below it are two white boxes. The left box contains the source file path: `libraries/sys-vm/external/Catch2/include/internal/catch_debug_console.cpp`. The right box contains the source file path: `libraries/sys-vm/external/Catch2/include/internal/catch_stream.cpp`. Two blue arrows point from the bottom of each white box to the bottom of the grey box, indicating that both source files include the header file.

libraries/sys-vm/external
/Catch2/include/internal
/catch_debug_console.cpp

libraries/sys-vm/external
/Catch2/include/internal
/catch_stream.cpp
