

sysio::state_history
_log::get_block_id

sysio::state_history
_log::write_entry

sysio::state_history
_log::get_entry

```
graph LR; A["sysio::state_history_log::get_block_id"] --> C["sysio::state_history_log::get_entry"]; B["sysio::state_history_log::write_entry"] --> C;
```

The diagram illustrates a dependency or relationship between three functions. On the left, there are two white rectangular boxes. The top box contains the text 'sysio::state_history_log::get_block_id' and the bottom box contains 'sysio::state_history_log::write_entry'. On the right, there is a gray rectangular box containing the text 'sysio::state_history_log::get_entry'. Two blue arrows originate from the right side of the two white boxes and point towards the left side of the gray box, indicating that both 'get_block_id' and 'write_entry' are related to or depend on 'get_entry'.
