

libraries/fc/include
/fc/network/resolve.hpp

```
graph BT; A[libraries/fc/src/log/gelf_appender.cpp] --> C[libraries/fc/include/fc/network/resolve.hpp]; B[libraries/fc/src/network/ntp.cpp] --> C;
```

The diagram illustrates a file dependency structure. At the top is a gray box representing a header file: `libraries/fc/include/fc/network/resolve.hpp`. Below it are two white boxes representing source files. The left box is `libraries/fc/src/log/gelf_appender.cpp` and the right box is `libraries/fc/src/network/ntp.cpp`. Two blue arrows point from the top of each source file box to the bottom of the header file box, indicating that both source files include the header.

libraries/fc/src/log
/gelf_appender.cpp

libraries/fc/src/network
/ntp.cpp
