

std::true_type

```
graph BT; CLI[CLI::is_bool< bool >] --> std[std::true_type];
```

A diagram illustrating a relationship between two C++ type traits. At the bottom, a gray rectangular box contains the text `CLI::is_bool< bool >`. A blue arrow points vertically upwards from the center of this box to the center of a white rectangular box above it. The white box contains the text `std::true_type`. This indicates that `CLI::is_bool< bool >` inherits from or is a specialization of `std::true_type`.

CLI::is_bool< bool >
