

`fc::fixed_string::operator=`

```
graph LR; A[fc::fixed_string::operator=] --> B[fc::fixed_string::fixed_string]; B --> C[memset];
```

The diagram illustrates a sequence of three components connected by arrows. The first component, `fc::fixed_string::operator=`, is enclosed in a gray box. A blue arrow points from this box to the second component, `fc::fixed_string::fixed_string`, which is in a white box. Another blue arrow points from the second component to the third component, `memset`, also in a white box.

`fc::fixed_string::fixed_string`

`memset`
