

sysio::chain::protocol
_feature_set::rend

```
graph LR; A[sysio::chain::protocol_feature_set::rend] --> B[sysio::chain::protocol_feature_set::crend]; B --> C[sysio::chain::protocol_feature_set::cbegin];
```

The diagram illustrates a sequence of three operations on the `sysio::chain::protocol_feature_set` object. The first operation, `rend`, is highlighted in a gray box. It is followed by `crend` and then `cbegin`, both in white boxes. Blue arrows indicate the flow from `rend` to `crend`, and from `crend` to `cbegin`.
