

mie::local::FixedBuffer
::alloc

mie::local::FixedBuffer
::operator[]

mie::local::FixedBuffer
::operator[]

mie::local::FixedBuffer
::verify

```
graph LR; A["mie::local::FixedBuffer::alloc"] --> D["mie::local::FixedBuffer::verify"]; B["mie::local::FixedBuffer::operator[]"] --> D; C["mie::local::FixedBuffer::operator[]"] --> D;
```

The diagram illustrates a control flow or data flow. On the left, there are three white rectangular boxes with black borders, each containing a C++-style identifier. The top box is 'mie::local::FixedBuffer::alloc', the middle is 'mie::local::FixedBuffer::operator[]', and the bottom is 'mie::local::FixedBuffer::operator[]'. On the right, there is a single gray rectangular box with a black border containing 'mie::local::FixedBuffer::verify'. Three blue arrows originate from the right side of the three white boxes and point towards the left side of the gray box, indicating that all three functions or operators lead to the 'verify' function.
