

fc::zipkin::impl::init

```
graph LR; A[fc::zipkin::impl::init] --> B[fc::set_os_thread_name]
```

A diagram showing a call from the function `fc::zipkin::impl::init` to the function `fc::set_os_thread_name`. The first function is in a grey box, and the second is in a white box. A blue arrow points from the first box to the second.

fc::set_os_thread_name
