

libraries/chain/include
/sysio/chain/webassembly
/runtime_interface.hpp

```
graph TD; A["libraries/chain/include  
/sysio/chain/webassembly  
/runtime_interface.hpp"] --> B["vector"]; A --> C["memory"];
```

The diagram illustrates a dependency structure. A top box contains the path to a header file: `libraries/chain/include`, `/sysio/chain/webassembly`, and `/runtime_interface.hpp`. Two blue arrows point from this box to two separate boxes below it, labeled `vector` and `memory`, indicating that the header file includes these two components.

vector

memory
