

libraries/chainbase  
/include/chainbase/environment.hpp

```
graph BT; A["libraries/chainbase/src/pinnable_mapped_file.cpp"] --> C["libraries/chainbase/include/chainbase/environment.hpp"]; B["plugins/chain_plugin/chain_plugin.cpp"] --> C;
```

The diagram illustrates a file dependency structure. At the top is a gray box representing a header file: `libraries/chainbase/include/chainbase/environment.hpp`. Below it are two white boxes representing source files. The left box is `libraries/chainbase/src/pinnable_mapped_file.cpp` and the right box is `plugins/chain_plugin/chain_plugin.cpp`. Blue arrows point from each source file box up to the header file box, indicating that both source files include the header file.
