

Catch::XmlReporter  
::assertionEnded

Catch::XmlReporter  
::sectionStarting

Catch::XmlReporter  
::testCaseStarting

Catch::XmlReporter  
::writeSourceInfo

```
graph LR; A[Catch::XmlReporter::assertionEnded] --> D[Catch::XmlReporter::writeSourceInfo]; B[Catch::XmlReporter::sectionStarting] --> D; C[Catch::XmlReporter::testCaseStarting] --> D;
```

The diagram illustrates a mapping from three source methods to a single target method. On the left, three white rectangular boxes are stacked vertically. Each box contains the text 'Catch::XmlReporter' followed by a method name on a new line. Blue arrows originate from the right side of each of these three boxes and point towards a single gray rectangular box on the right. This gray box also contains the text 'Catch::XmlReporter' followed by a method name on a new line. The arrows indicate that the three source methods are being mapped or transformed into the single target method.
