

libraries/fc/vendor
/websocketpp/test/connection
/connection_tu2.hpp

```
graph BT; A["libraries/fc/vendor  
/websocketpp/test/connection  
/connection.cpp"] --> C["libraries/fc/vendor  
/websocketpp/test/connection  
/connection_tu2.hpp"]; B["libraries/fc/vendor  
/websocketpp/test/connection  
/connection_tu2.cpp"] --> C;
```

The diagram illustrates a file dependency structure. At the top is a grey box representing a header file: `libraries/fc/vendor/websocketpp/test/connection/connection_tu2.hpp`. Below it are two white boxes representing source files. The left box is `libraries/fc/vendor/websocketpp/test/connection/connection.cpp` and the right box is `libraries/fc/vendor/websocketpp/test/connection/connection_tu2.cpp`. Two blue arrows point from the top of each source file box to the bottom of the header file box, indicating that both source files include the header.
