

libraries/fc/include
/fc/network/message_buffer.hpp

```
graph BT; A["libraries/fc/test/network/test_message_buffer.cpp"] --> C["libraries/fc/include/fc/network/message_buffer.hpp"]; B["plugins/net_plugin/net_plugin.cpp"] --> C;
```

The diagram illustrates a file dependency structure. At the top is a grey box representing a header file: `libraries/fc/include/fc/network/message_buffer.hpp`. Below it are two white boxes representing source files. The left box is `libraries/fc/test/network/test_message_buffer.cpp` and the right box is `plugins/net_plugin/net_plugin.cpp`. Two blue arrows point from the bottom of each source file box up to the header file box, indicating that both source files include the header.

libraries/fc/test/network
/test_message_buffer.cpp

plugins/net_plugin
/net_plugin.cpp
