EXCEPTION_TEST_CASE

EXCEPTION_TEST_CASE

chainbase::undo_index::get

```
graph LR; A[BOOST_AUTO_TEST_CASE] --> D[chainbase::undo_index::get]; B[EXCEPTION_TEST_CASE] --> D; C[EXCEPTION_TEST_CASE] --> D;
```

The diagram illustrates three test cases on the left, each enclosed in a white box with a black border. These boxes are arranged vertically. Three blue arrows originate from the right side of each of these boxes and point towards a single, gray-shaded box on the right. The gray box contains the text 'chainbase::undo_index::get', which appears to be a function name or a specific test case identifier. The arrows indicate a relationship or mapping from the three test cases to this central function.
