

Catch::Matchers::StdString  
::ContainsMatcher::match

Catch::WildcardPattern  
::matches

Catch::contains

```
graph LR; A[Catch::Matchers::StdString::ContainsMatcher::match] --> C[Catch::contains]; B[Catch::WildcardPattern::matches] --> C;
```

The diagram illustrates a mapping from two specific matcher functions to a general 'contains' function. On the left, there are two white rectangular boxes. The top box contains the text 'Catch::Matchers::StdString::ContainsMatcher::match'. The bottom box contains the text 'Catch::WildcardPattern::matches'. Two blue arrows originate from the right side of these boxes. The arrow from the top box points to the top-left corner of a gray rectangular box on the right. The arrow from the bottom box points to the top-left corner of the same gray box. The gray box contains the text 'Catch::contains'.
