

Catch::MessageStream

```
graph BT; MB[Catch::MessageBuilder] --> MS[Catch::MessageStream];
```

The diagram illustrates a relationship between two classes. At the top is a gray rectangular box labeled "Catch::MessageStream". Below it is a white rectangular box labeled "Catch::MessageBuilder". Two blue arrows originate from the top of the "Catch::MessageBuilder" box and point upwards to the bottom of the "Catch::MessageStream" box, indicating that "Catch::MessageBuilder" inherits from or implements "Catch::MessageStream".

Catch::MessageBuilder
