

ReadMMX::ReadMMX

WriteMMX::WriteMMX

Xbyak::CodeGenerator  
::movd

```
graph LR; A[ReadMMX::ReadMMX] --> C[Xbyak::CodeGenerator::movd]; B[WriteMMX::WriteMMX] --> C;
```

The diagram illustrates a flow from two source functions to a target code generator. On the left, two white rectangular boxes are stacked vertically. The top box contains the text 'ReadMMX::ReadMMX' and the bottom box contains 'WriteMMX::WriteMMX'. Both boxes have a thin black border. Two blue arrows originate from the right side of these boxes. The arrow from the top box points to the upper part of a larger gray box on the right, and the arrow from the bottom box points to the lower part of the same gray box. The gray box has a black border and contains the text 'Xbyak::CodeGenerator' on the top line and '::movd' on the bottom line.
