

sysio::trace_api::compressed
_file_datastream::get

sysio::trace_api::compressed
_file_datastream::skip

sysio::trace_api::compressed
_file_datastream::read

```
graph LR; A["sysio::trace_api::compressed_file_datastream::get"] --> C["sysio::trace_api::compressed_file_datastream::read"]; B["sysio::trace_api::compressed_file_datastream::skip"] --> C;
```

The diagram illustrates a dependency or inheritance relationship. On the left, two white rectangular boxes with black borders contain the function names 'sysio::trace_api::compressed_file_datastream::get' and 'sysio::trace_api::compressed_file_datastream::skip'. On the right, a gray rectangular box with a black border contains the function name 'sysio::trace_api::compressed_file_datastream::read'. Two blue arrows originate from the right side of the left boxes and point towards the left side of the gray box, indicating that the 'get' and 'skip' functions are related to or derived from the 'read' function.
