

TestWithParam< int >

```
graph BT; A[TestGenerationTest] --> B[TestWithParam< int >];
```

The diagram illustrates a class inheritance relationship. At the bottom is a gray rectangular box containing the text 'TestGenerationTest'. A blue arrow points vertically upwards from the top center of this box to the bottom center of a white rectangular box with a black border located above it. The white box contains the text 'TestWithParam< int >'. This visualizes 'TestGenerationTest' as a derived class that inherits from the 'TestWithParam' template class, specifically instantiated with the 'int' type.
