

fc::std\_exception\_wrapper  
::dynamic\_rethrow\_exception

fc::unhandled\_exception  
::dynamic\_rethrow\_exception

fc::exception::dynamic  
\_rethrow\_exception

```
graph LR; A["fc::std_exception_wrapper::dynamic_rethrow_exception"] --> C["fc::exception::dynamic_rethrow_exception"]; B["fc::unhandled_exception::dynamic_rethrow_exception"] --> C;
```

The diagram illustrates a relationship between three functions. On the left, there are two white rectangular boxes. The top box contains the text 'fc::std\_exception\_wrapper::dynamic\_rethrow\_exception' and the bottom box contains 'fc::unhandled\_exception::dynamic\_rethrow\_exception'. On the right, there is a gray rectangular box containing the text 'fc::exception::dynamic\_rethrow\_exception'. Two blue arrows point from the right side of each white box to the left side of the gray box, indicating that both functions on the left are related to or point to the function in the gray box.
