

sysio::chain::webassembly
::interface::send_context
_free_inline

```
graph LR; A["sysio::chain::webassembly  
::interface::send_context  
_free_inline"] --> B["fc::raw::unpack"]; B --> B;
```

The diagram illustrates a function call. A gray box on the left contains the text 'sysio::chain::webassembly::interface::send_context_free_inline'. A blue arrow points from this box to a white box on the right containing the text 'fc::raw::unpack'. A curved blue arrow also points from the right box back to itself, indicating a self-call or loop.

fc::raw::unpack
