

```
sysio::chain::wasm  
_interface_impl::parse  
_initial_memory
```

```
graph LR; A["sysio::chain::wasm  
_interface_impl::parse  
_initial_memory"] --> B["memcpy"]
```

A diagram showing a call from the `sysio::chain::wasm` module to the `memcpy` function. The call is represented by a blue arrow pointing from a gray box on the left to a white box on the right. The gray box contains the text `sysio::chain::wasm`, `_interface_impl::parse`, and `_initial_memory`. The white box contains the text `memcpy`.

`memcpy`
