AreSatisfied

testing::internal::
ExpectationBase::FindUnsatisfied
Prerequisites

testing::internal::
ExpectationBase::RetireAll
PreRequisites

testing::ExpectationSet
::begin

```
graph LR; A[testing::internal::ExpectationBase::AllPrerequisitesAreSatisfied] --> D[testing::ExpectationSet::begin]; B[testing::internal::ExpectationBase::FindUnsatisfiedPrerequisites] --> D; C[testing::internal::ExpectationBase::RetireAllPreRequisites] --> D;
```

The diagram illustrates the relationship between three internal methods of the `testing::internal::ExpectationBase` class and the `testing::ExpectationSet::begin` method. Three light blue arrows point from the left-side boxes to the right-side box, indicating that these internal methods are used or called by the `begin` method.
