

sysiosystem::producer  
\_info::get\_producer\_authority

sysiosystem::system  
\_contract::regproducer

sysiosystem::convert  
\_to\_block\_signing\_authority

```
graph LR; A["sysiosystem::producer_info::get_producer_authority"] --> C["sysiosystem::convert_to_block_signing_authority"]; B["sysiosystem::system_contract::regproducer"] --> C;
```

The diagram illustrates a mapping or conversion process. On the left, two white rectangular boxes represent source functions: 'sysiosystem::producer\_info::get\_producer\_authority' (top) and 'sysiosystem::system\_contract::regproducer' (bottom). On the right, a gray rectangular box represents the target function: 'sysiosystem::convert\_to\_block\_signing\_authority'. Two blue arrows originate from the right side of the source boxes and point towards the left side of the target box, indicating that both source functions are converted or mapped to the target function.
