

GenericValue::GenericValue

```
graph LR; A[GenericValue::GenericValue] --> B[GenericValue::SetStringRaw]; B --> C[GenericValue::SetStringPointer];
```

The diagram illustrates a sequence of three methods from the GenericValue class. The first method, GenericValue::GenericValue, is highlighted with a gray background. A blue arrow points from this box to the second box, GenericValue::SetStringRaw. Another blue arrow points from the second box to the third box, GenericValue::SetStringPointer. All boxes have a thin black border.

GenericValue::SetStringRaw
