

libff::bn128\_G1::batch  
\_to\_special\_all\_non\_zeros

libff::bn128\_G2::batch  
\_to\_special\_all\_non\_zeros

libff::bn\_batch\_invert

```
graph LR; A["libff::bn128_G1::batch_to_special_all_non_zeros"] --> C["libff::bn_batch_invert"]; B["libff::bn128_G2::batch_to_special_all_non_zeros"] --> C;
```

The diagram illustrates a dependency or inheritance relationship. Two source functions, 'libff::bn128\_G1::batch\_to\_special\_all\_non\_zeros' and 'libff::bn128\_G2::batch\_to\_special\_all\_non\_zeros', are shown in white boxes on the left. Blue arrows point from each of these boxes to a single target function, 'libff::bn\_batch\_invert', which is shown in a gray box on the right.
