

base::transport_config

```
graph BT; A[deflate_config::transport_config] --> B[base::transport_config];
```

The diagram illustrates a class inheritance relationship. At the bottom is a gray rectangular box containing the text 'deflate_config::transport_config'. Two blue arrows originate from the top edge of this box and point upwards towards the bottom edge of a white rectangular box at the top. The white box contains the text 'base::transport_config'. This visualizes that 'deflate_config::transport_config' inherits from 'base::transport_config'.
