

sysio::wallet::soft  
\_wallet::check\_password

sysio::wallet::soft  
\_wallet::unlock

sysio::wallet::soft  
\_wallet::get\_wallet  
\_filename

```
graph LR; A["sysio::wallet::soft_wallet::check_password"] --> C["sysio::wallet::soft_wallet::get_wallet_filename"]; B["sysio::wallet::soft_wallet::unlock"] --> C;
```

The diagram illustrates a dependency or call relationship. Two source functions, 'sysio::wallet::soft\_wallet::check\_password' and 'sysio::wallet::soft\_wallet::unlock', are shown in white boxes on the left. Blue arrows point from each of these boxes to a single target function, 'sysio::wallet::soft\_wallet::get\_wallet\_filename', which is shown in a gray box on the right.
