

libraries/fc/include
/fc/crypto/blowfish.hpp

```
graph TD; A["libraries/fc/include  
/fc/crypto/blowfish.hpp"] --> B["stdint.h"]; B --> C["limits.h"]; B --> D["wchar.h"];
```

The diagram illustrates the inclusion of the `stdint.h` header file. A top-level box, shaded gray, contains the path `libraries/fc/include` and the file `/fc/crypto/blowfish.hpp`. A blue arrow points from this box to a central white box with a black border labeled `stdint.h`. From the `stdint.h` box, two blue arrows branch out to two separate gray boxes at the bottom: `limits.h` on the left and `wchar.h` on the right.
