

```
std::enable_shared  
_from_this< fc::api  
_connection >
```

```
graph BT; A[fc::rpc::cli] --> B[fc::api_connection]; B --> C[std::enable_shared_from_this< fc::api_connection >];
```

The diagram illustrates a C++ inheritance hierarchy. At the base is a gray box labeled `fc::rpc::cli`. A blue arrow points from this box to a white box labeled `fc::api_connection`. Another blue arrow points from the `fc::api_connection` box to a top white box labeled `std::enable_shared_from_this< fc::api_connection >`. The top box contains the text split across three lines: `std::enable_shared`, `_from_this< fc::api`, and `_connection >`.

```
fc::api_connection
```

```
fc::rpc::cli
```
